Dear Hiring Manager,

Re: Application for Angular | Front-End Developer

I am an Angular-focused front-end engineer with **9 + years** of experience delivering **scalable | maintainable | enterprise-grade** UI systems. My expertise spans **Angular (2 – 18) | TypeScript | RxJS** integrated with **.NET Core APIs**, and I take full ownership from **architecture | UX** through to **testing | release**.

What I Bring

- **Angular at scale:** Modular architecture | standalone components | reactive forms | state management (Signals).
 - **Clean | reliable code:** Unit | component testing | CI/CD pipelines | code reviews | pragmatic RxJS (switchMap | concatMap).
 - **Enterprise mindset:** Balances BAU stability | Agile feature delivery | cross-team collaboration.
 - **Full-stack fluency:** .NET Core APIs | SQL troubleshooting via SSMS | RESTful integrations.
-

I am drawn to teams that value **clean architecture | disciplined delivery | collaboration**. I'd welcome the opportunity to contribute my Angular expertise and help deliver **scalable | maintainable | high-impact** front-end solutions for your organization.

Thank you for your time — I would appreciate the opportunity to discuss how I can add value to your team.

You can reach me at **021 288 7337** or **cm.young.nz@gmail.com**.

Kind regards,
Cameron Young
